Art Unit: 1614

Status of Claims

1. Applicants' Information Disclosure Statement, filed 8/02/2006, is acknowledged and has been reviewed to the extent each reference is a proper citation on a U.S. Patent.
2. Claims 1-2 are pending.
3. Claims 1-2 are under consideration.
4. Claims 1-2 are being considered as claims to a compound.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "catenane compound is dissolved in a **solution**" (emphasis added). There is insufficient antecedent basis for this limitation in Claim 1. No solution has been disclosed Claim 1.

Art Unit: 1614

The term "greater" in Claim 2 is a relative term which renders the claim indefinite. The term "greater" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takata et al. (Chemistry Letters, 1997, No. 9).

Instant Claim 1 is drawn to a catenane compound defined by the chemical formula (I) recited in the claim. Claim 2 is drawn to the compound of Claim 1, dissolved in a solution at a concentration of 300 µg/mL.

Takata et al. teach the compound of Claim 1 (see page 882, column 1, compound in box). The solubility of the compound, and thus its maximum dissolved concentration, is dependent upon the specific solvent used as well as other factors such as temperature; however, solubility is an inherent property of the compound. Takata et al. teach a solution of the compound of Claim 1. The compound is dissolved in a solvent of DMSO:CDCl₃ (dimethylsulfoxide and deuterated chloroform mixed in a 1:1

Art Unit: 1614

(v/v) ratio) at a concentration of at least 5 mg/ml for NMR analysis (see Figure 1, page 882).

Since Takata et al. teach the instant compound, Claims 1-2 are properly rejected.

Conclusion

10. Claims 1-17 are rejected.
11. No claims are allowed.
